SUMMARY

Computer Science undergraduate with strong foundations in **Data Structures & Algorithms, OOP, DBMS, and software development**, with a **LeetCode rating of 1659**. Experienced in **C++, Python, Java, JavaScript, REST APIs, and full-stack application development**, with hands-on experience building practical software solutions and AI-powered applications. **Driven to solve complex engineering problems and build secure, efficient, and scalable software systems.**

EDUCATION

Chandigarh University, Mohali — Chandigarh, Punjab
Bachelor Of Engineering in Computer Science Engineering (AI & ML) | CGPA: 8.51 — *2024 - 2028*

Guru Ram Dass Academy, Ludhiana — Ludhiana, Punjab
Senior Secondary (PCM) | Percentage: 82.4 % — *May 2024*

Guru Ram Dass Academy, Ludhiana — Ludhiana, Punjab
Secondary (Class X) | Percentage: 94.6 % — *May 2022*

TECHNICAL SKILLS

- **Programming Languages:** C, C++, Java, Python, JavaScript, SQL
- **Web Development & APIs:** React.js, Node.js, Express.js, FastAPI, Tailwind CSS, REST APIs
- **AI & Agentic AI**: LLM Applications, AI Agents, RAG Systems, LangChain, LangGraph, Prompt Engineering
- **Databases & Vector Stores:** SQL, Neo4j, Qdrant, MongoDB, PostgreSQL
- **Coursework:** Data Structures & Algorithms, OOP, DBMS, Web Development, Operating Systems
- **Tools & Platforms:** Git, GitHub, Docker, Hugging Face, Google Cloud Platform, VS Code

PROJECTS

DRISHTI: Predictive Cyber-Fraud & Cash-Out Intelligence Platform | Github↗ — Sep 2026 – Present
React, Spring Boot, Python, NLP, Machine Learning, Neo4j, RAG, Agentic AI

- Developed an end-to-end AI-powered cyber-fraud intelligence platform integrating React, Spring Boot, Python, Neo4j, NLP, ML, RAG, and Agentic AI for predictive fraud analysis.
- Implemented NLP and ML pipelines to extract entities, analyze financial and complaint data, and identify suspicious relationships and behavioral patterns.
- Built a graph-based intelligence layer using Neo4j to model and analyze connections across persons, accounts, transactions, locations, and cases.
- Integrated RAG and Agentic AI capabilities to enable natural-language investigation, contextual reasoning, and explainable insights from structured and unstructured fraud data.

Concentria – Real-Time AI Phishing Detection System | Github↗ — June 2025
Python, TensorFlow, Node.js, MongoDB, Browser APIs

- Developed a browser-based security platform to detect phishing websites and suspicious activities using deep learning and graph-based threat analysis.
- Built a real-time threat detection pipeline with low-latency alerts, enabling proactive identification of malicious websites and zero-day phishing attempts.
- Implemented a privacy-focused consent management system and centralized dashboard to monitor permissions, cookies, and geolocation access.

Aura – Autonomous Unified Research Assistant | Github↗ — May 2026
Python, FastAPI, React, LangChain, LangGraph, Gemini API, Qdrant

- Building an AI-powered research copilot to analyze academic papers and answer research questions using Retrieval-Augmented Generation (RAG).
- Developing semantic search and multi-paper comparison to analyze research methodologies, findings, datasets, and limitations.
- Implementing agentic research workflows using LangGraph to automate evidence retrieval, cross-paper analysis, and research synthesis.
- Designing a research gap identification engine to uncover potential gaps, generate hypotheses, and produce citation-backed research reports.

ACHIEVEMENTS & CERTIFICATIONS

- Solved **300+ Data Structures & Algorithms (DSA)** problems and attained a **1659 contest rating** on **LeetCode↗**
- **2× Smart India Hackathon (SIH) Internal Round Winner — 2025 & 2026**
- Finalist - IBM National Hackathon 2026
- Finalist at Zinnovatio 3.0
- Completed Agentic AI Course – Udemy (May 2026)
- Complete Web Development Bootcamp – Udemy (Jan 2026)
