SUMMARY

Computer Science Engineering (AI & ML) undergraduate with strong foundations in Data Structures & Algorithms, object-oriented programming, and full-stack development. Experienced in building scalable AI-powered applications using React, Node.js, FastAPI, and modern LLM frameworks. Solved 250+ DSA problems; Leetcode Rating: 1549 and winner of Tekathon 4.0. Passionate about solving real-world engineering problems through efficient and scalable software solutions.

EDUCATION

Chandigarh University, Mohali — Chandigarh, Punjab
Bachelor Of Engineering in Computer Science Engineering (AI & ML) | CGPA: 8.51 — *2024 - 2028*

Guru Ram Dass Academy, Ludhiana — Ludhiana, Punjab
Senior Secondary (PCM) | Percentage: 82.4 % — *May 2024*

Guru Ram Dass Academy, Ludhiana — Ludhiana, Punjab
Secondary (Class X) | Percentage: 94.6 % — *May 2022*

TECHNICAL SKILLS

- **Programming Languages:** C, C++, Java, Python, JavaScript, SQL
- **Web Development & APIs:** React.js, Node.js, Express.js, FastAPI, Tailwind CSS, REST APIs
- **AI & Agentic AI**: LLM Applications, AI Agents, RAG Systems, LangChain, LangGraph, Prompt Engineering
- **Databases & Vector Stores:** SQL, Neo4j, Qdrant, MongoDB, PostgreSQL
- **Coursework:** Data Structures & Algorithms, OOP, DBMS, Web Development, Operating Systems
- **Tools & Platforms:** Git, GitHub, Docker, Hugging Face, Google Cloud Platform, VS Code

PROJECTS

AURA: Autonomous Unified Research Assistant — May 2026(Present)
Python, FastAPI, LangGraph, LangChain, LlamaParse, Qdrant,Celery, Redis, Gemini API

- **Architected an event-driven, multi-agent platform** (LangGraph) to autonomously generate literature reviews and gap analyses from user queries.
- **Engineered an asynchronous PDF ingestion pipeline** (Celery, Redis), eliminating API timeouts and reducing document processing latency by 40%.
- Optimized RAG accuracy and reduced token costs by 30% using metadata-aware semantic chunking (LlamaParse) and Qdrant vector search.
- Prevented agentic drift and hallucination by enforcing strict JSON-schema validation (Pydantic) between specialized worker agents.

Concentria – Real-Time AI Phishing Detection System — June 2025
Python, TensorFlow, Node.js, MongoDB, Browser APIs

- Developed a browser-based security platform to detect phishing websites and suspicious activities using deep learning and graph-based threat analysis.
- Built a real-time threat detection pipeline with low-latency alerts, enabling proactive identification of malicious websites and zero-day phishing attempts.
- Implemented a privacy-focused consent management system and centralized dashboard to monitor permissions, cookies, and geolocation access.

ACHIEVEMENTS & CERTIFICATIONS

- Solved **250+ Data Structures & Algorithms (DSA)** problems and attained a **1538 contest rating** on LeetCode
- **Winner – Tekathon 4.0 Hackathon**, Chandigarh University (Sept 2025)
- Finalist at Zinnovatio 3.0 and participant in 5+ national hackathons
- Completed Agentic AI Course – Udemy (May 2026)
- ChatGPT Advanced Data Analysis – Vanderbilt University (Feb 2026)
- Complete Web Development Bootcamp – Udemy (Jan 2026)
- Mathematics for Machine Learning: Linear Algebra – Imperial College London (Sept 2025)
- Python for Data Science, AI & Development – IBM (March 2025)
- Foundations of AI and Machine Learning – Microsoft (March 2025)
